

CHIKO Sheet Metal Roof Clamp :

- | The rail-less alternative with a Watertight substructure

Flexible applications:

- | Chiko sheet metal roof clamp be mounted right onto metal roof, requires no rails and, the modules are quick and easy to attached.
- | The system meets the same requirements for waterproofing because of the special rubber pad.
- | The system also can be mounted onto pitch tile roof as in-roof, if a existing metal roofing.

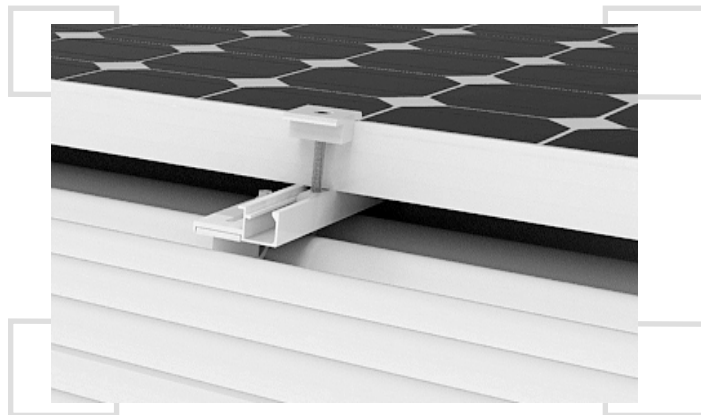

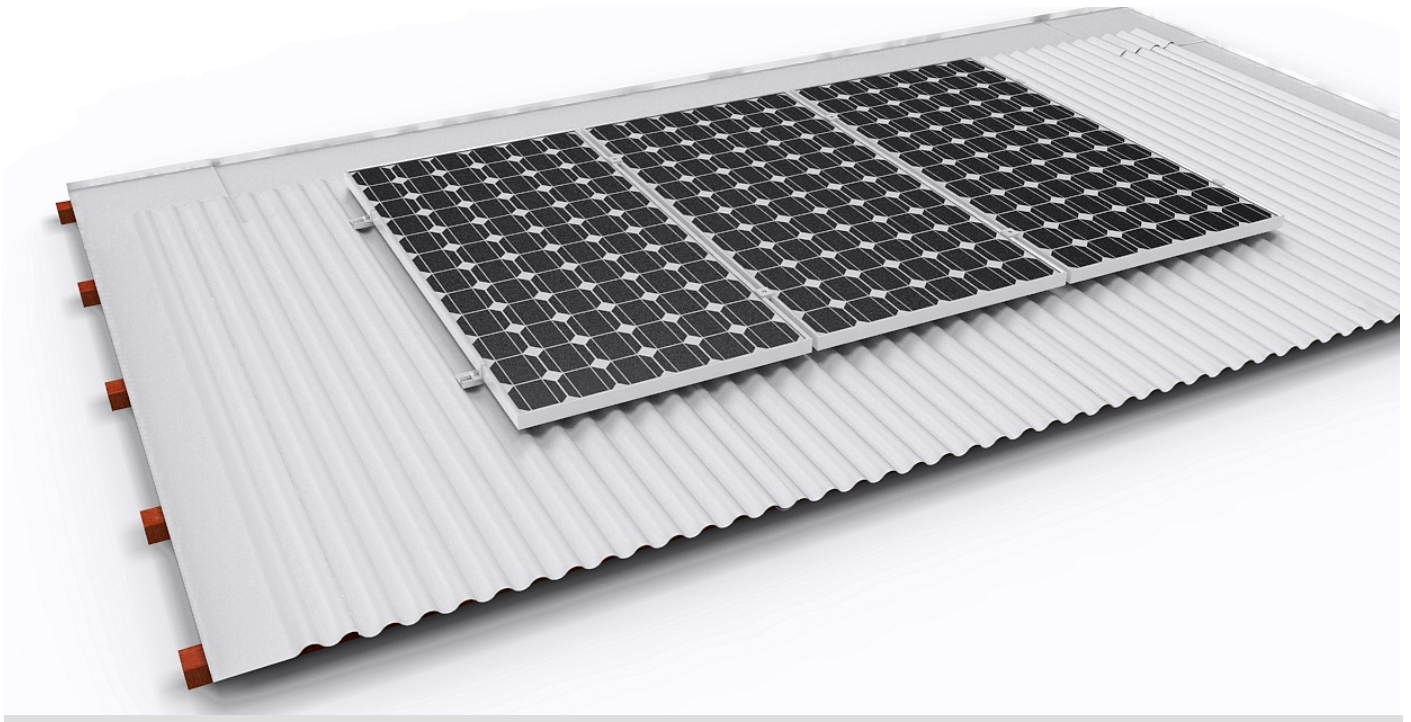

Convenient Installation:

- | Time savings from the high level of preassembled components
- | Rapid and secure installation
- | Innovative PV mounting system without continuous rails

Maximum Safety:

- | High corrosion resistance enables maximum service life
- | Reliable waterproofing due to the special rubber pad

Application:	Metal roof Pitch tile roof
Roof cladding:	Suitable for most types of roof cladding
Roof slop:	0-45 Degree
PV modules:	Framed
Type of mounting:	Flat
Module orientation:	Portrait
Size of the module array:	Any size possible
Position of the module array:	No special requirements
Supporting profiles:	Aluminum 6005-T5
Small parts:	Wooden bolts (stainless steel) Mid/End Clamp (Aluminum)
Surface:	Silver anodized
Roof flashing:	EPDM rubber pad
Metal roofing:	In roof for pitch tile roof (not incl.)
Warranty:	10 years
